[] BUILDING EMPLOYEE BULLETIN

No. 87

24 November 1982

SUBJECT: New Parking Procedures

25X1A6A

1. On 1 December 1982 the [] Building will be occupied by approximately 200 people. This is expected to create a parking shortage in that area. To minimize the impact of the additional people, [] Building overflow parking will be accommodated in the [] Building parking lot. One portion of the [] parking lot (see attached sketch) has been designated specifically for this purpose, and a shuttle service to and from the [] Buildings will be operated every 15 minutes from 0730 to 1735 hours for the convenience of those persons using these spaces. Personnel assigned to the [] Building are asked to refrain from parking in these spaces as they have been leased especially for the [] personnel.
